

JOSE MANUEL OCHOA JR

"JACK OF ALL TRADES" - STUDENT AT DEPAUL

Information Technology student with hands-on experience in **teaching STEM, technical troubleshooting, and hardware-focused projects.**

I enjoy building things and understanding how systems work, whether that's designing CAD models for 3D printing, learning web development, or experimenting with electronics and PCB design.

• EDUCATION

DePaul University
Information Technology Major
DePaul Honors Program
2024 - 2028

St. Laurence High School
National Honors Society / Student Ambassador
2020 - 2024

• SKILLS

- CAD Modeling
- 3D Printing
- Digital Fabrication
- CNC
- Prototyping
- Programming
- Linux Experience
- Troubleshooting
- UI/UX
- Graphic Design
- Web Development
- Docker/K3S

• WORK EXPERIENCE

LOWES SALES FLOOR ASSOCIATE

Lowe's Companies, Inc. (Mar 2025 - Present)

Assist customers with product selection and technical questions while supporting daily operations. Operate forklifts to move inventory safely. Employee of the Month 3x in span of year.

Geek Squad Associate

Geek Squad (Oct 2024 - Feb 2025)

Diagnosed and resolved hardware, software, and connectivity issues across laptops, desktops, and mobile devices. Guided customers through repairs in clear, non-technical language. Managed device intake and tracked service tickets. Employee of the Month for consistent performance and teamwork.

Chick-Fil-A Kitchen Team Member

Chick-fil-A Restaurants (Jun 2023 - Oct 2023)

Prepared and cooked food in a kitchen, maintaining speed and accuracy during busy hours. Upheld food safety and sanitation standards. Employee of the Month twice.

STEM INSTRUCTOR / CAD MENTOR

St. Laurence High School (May 2023 - Oct 2023)

Taught middle school students CAD modeling, 3D printing, and engineering fundamentals. Guided students through designing prototypes and maintained classroom technology.

• ACCOMPLISHMENTS

Home Lab:
Self-hosted a personal server stack using Docker on a ThinkCentre, running services including Nextcloud, Vaultwarden, and media tools across Raspberry Pi nodes.

Personal Portfolio & Blog: Designed and built hubofjose.quest from pure HTML/CSS/JS, currently live with ongoing updates.

Daft Punk Helmet Replica: Modeled a Thomas Bangalter helmet in Blender, fabricated via 3D printing and hand finishing, with integrated programmable LEDs.

CNC "kotatsu" Table: Designed and machined a custom Japanese-inspired low table using CNC toolpaths, from digital model to finished physical piece.
